

Module 4 : Linkers and Loader

- Explain about BSS
- Explain about types of cards used in direct linking loader
- Diff between dynamic loader and dynamic linking
- ✓ • Difference between Linker and Loader
- Difference between Linking loader and Linking editor
- ✓ • Write the functions of loader
- ✓ • Share advantages and disadvantages of absolute loader
- General Loader , Pre-loading Loader , Dynamic Linking Loader , Direct Linking Loader
- Explain about loader and types loader
- Explain about Linkers
- Explain Direct Linking Loader and Dynamic linking Loader and there difference
- Explain Compile go loader and absolute loader and its advantages and disadvantages
- Relocating Loader

Module 5 : Compiler : Analysis Phase

- ✓ • Phases of Compiler
- ✓ • First and Follow
- ✓ • LL1 (Table)
- ✓ • Shift Reduce Parser
- ✓ • Operator precedence (Bottom Up)
 - LR0
 - SLR
 - Role of CFG in Syntax analysis
 - Role of Finite Automata in Lexical Analysis
- ✓ • Compare up-down and bottom-up parser
 - What do you mean by operator precedence grammar
 - Explain in detail LL1 and SLR parser

Module 6 : Compiler : Synthesis Phase

- What is code optimization
- What are different issues in code generation phase of compiler
- Explain different code optimization techniques in detail
- Explain the issues in designing code generation
- 3 address code
- Block phase
- ✓ • Difference Between code optimization and code generation
